

ZOAR

Myriam Weyl Ben Arush
Pediatric Hematology Oncology
Meyer Children's Hospital
Rambam Health Care Campus
Haifa, ISRAEL

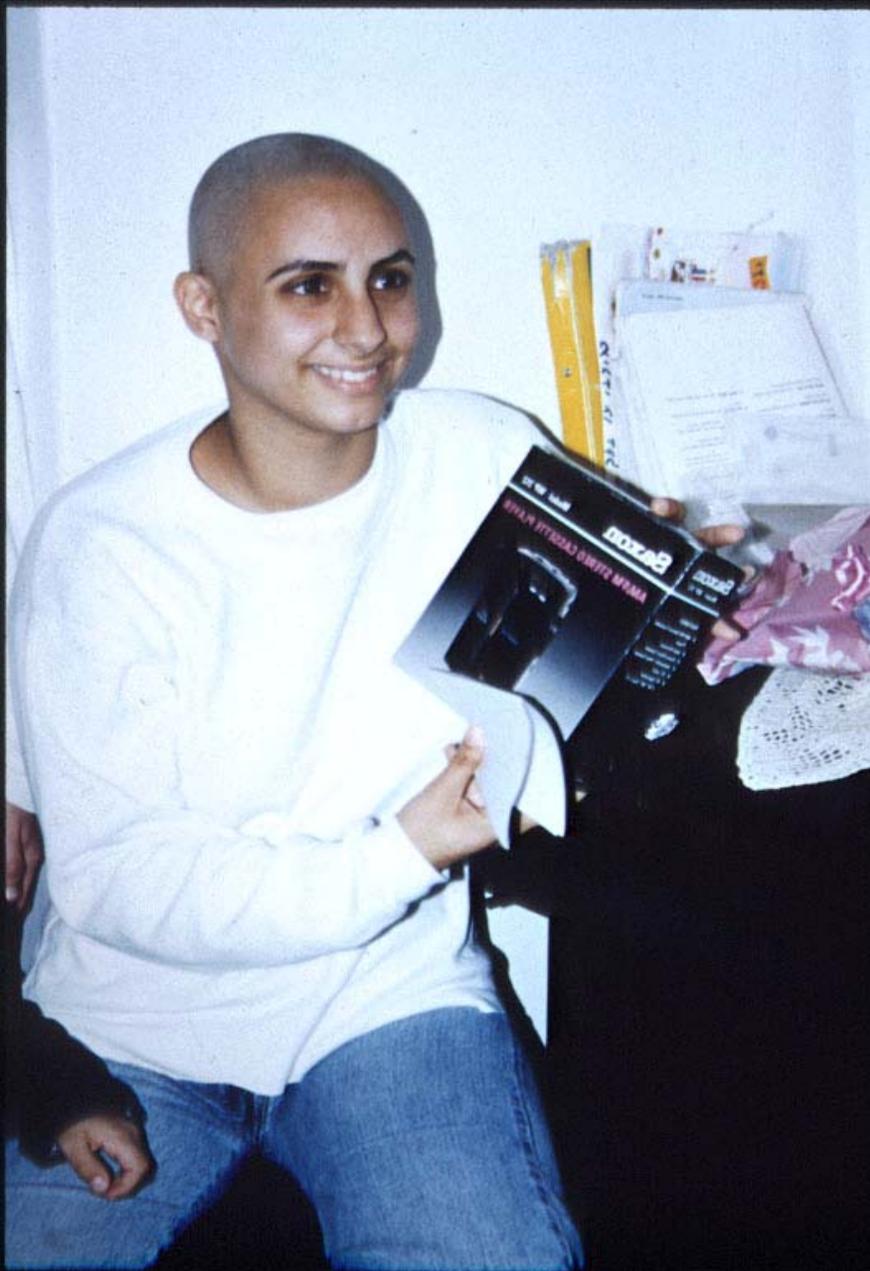

- Ewing Sarcoma of the leg at the age of 14 years old
- Non metastatic
- Complete remission after 3 months
- One year of treatment including chemotherapy and surgery

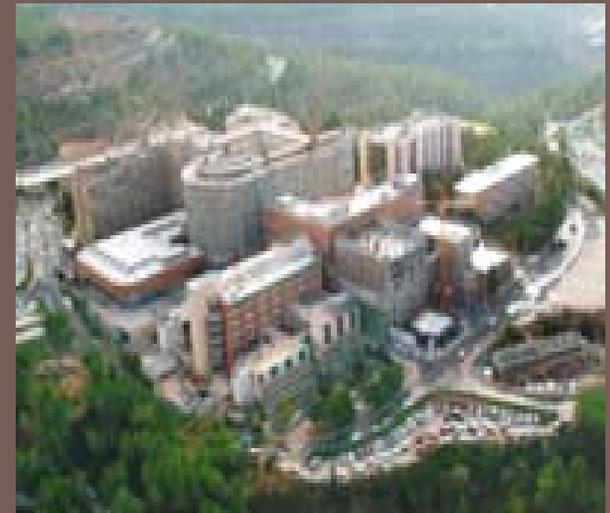

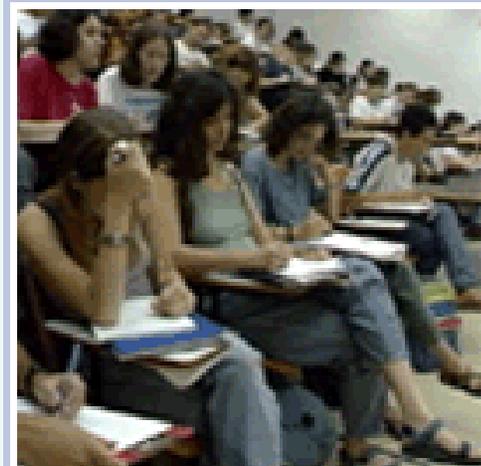

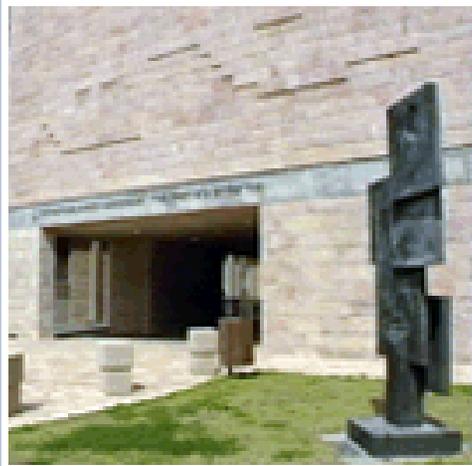

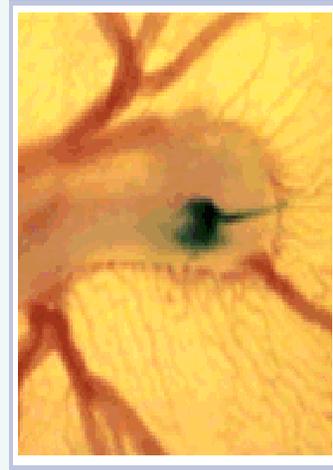

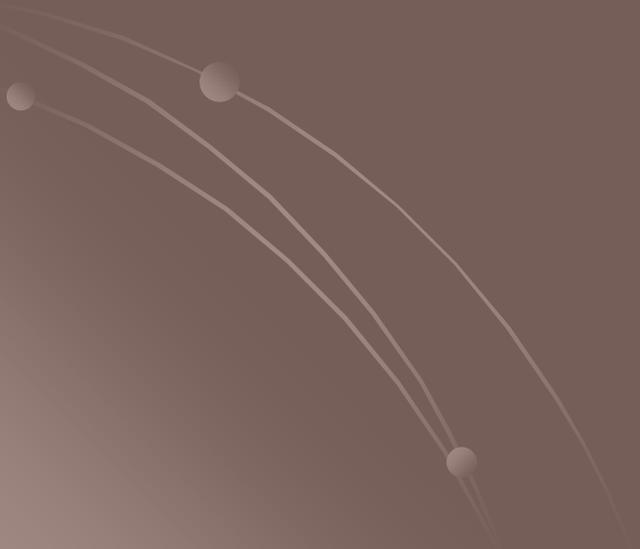

- Follow up at my clinic
- After 5 years follow up at the “long term survivors “ clinic
- During the follow up in my clinic before the recurrence, ended college, traveled around the world, went to the army and finally started medicine school at Jerusalem .

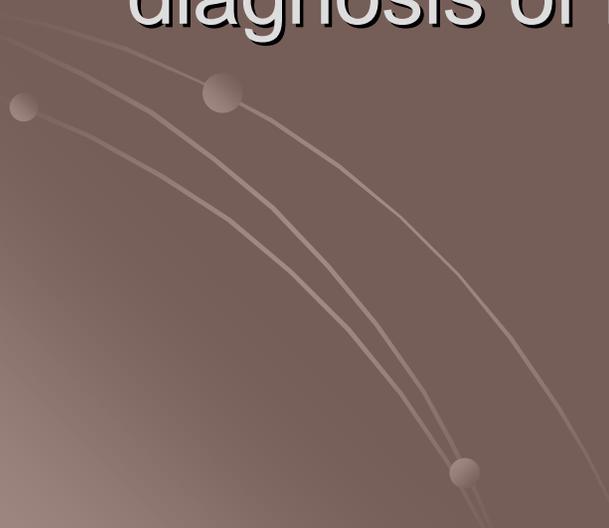

- 7 years after diagnosis: lymph node in the inguinal area: biopsy: recurrence
- Staging: Huge mass in the pelvis + lung metas

ST

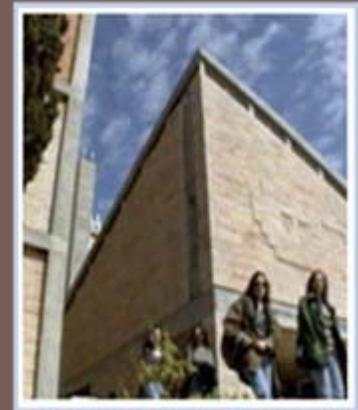

- Received first line chemotherapy, never entered complete remission
 - Received 2nd line and third line chemo, radiotherapy and died 2 years after diagnosis of recurrence
- 

- From the beginning I was her physician, told her the diagnosis , the remission, the recurrence, the prognosis.
- Confidence between us.
- She appreciated I told her the truth, all the time.
- She felt that I have to know everything, even in her private life and follow her medical study, her notes and the names of her best friends.
- Sometimes I felt like her mother, sometimes I felt she is my daughter.
- We had so long conversations mostly in the evening

- The day before she died she said me thanks and good bye. I cried...in the department, and went to my room to stay alone.
- She died the day after at 5 in the morning, I came immediately.
- I did not go to the funerals, but to the sheva (I stayed almost 4 hours with her parents)
- And then to the ceremony at the faculty of medicine and gave a talk to her classmates and her teachers

- 1985-2007:
 - 70 children per year: almost 1600 children treated in my department, about 500 died....
-
